

Local Game Match Machine

Anthony, Giuliana, Shahe

Description

Our project is a gaming chat for local multiplayer games.

Its goal is to help you find people near you who are playing the same game.

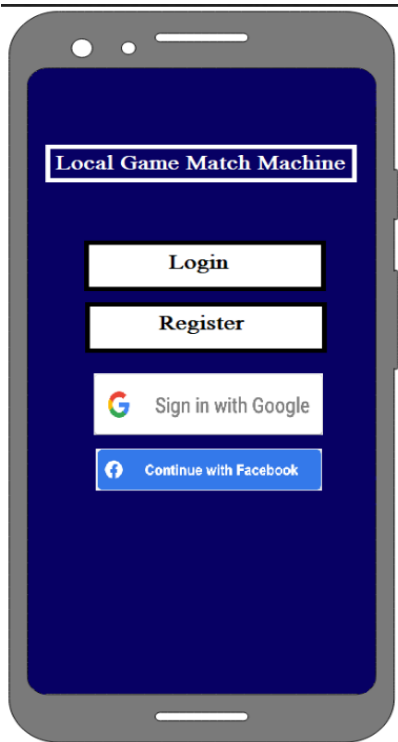

It allows you to see what other people are playing (if they have enabled it) and see who is nearby and playing the same game. It also allows you to chat with people using the app.

Mock-Up

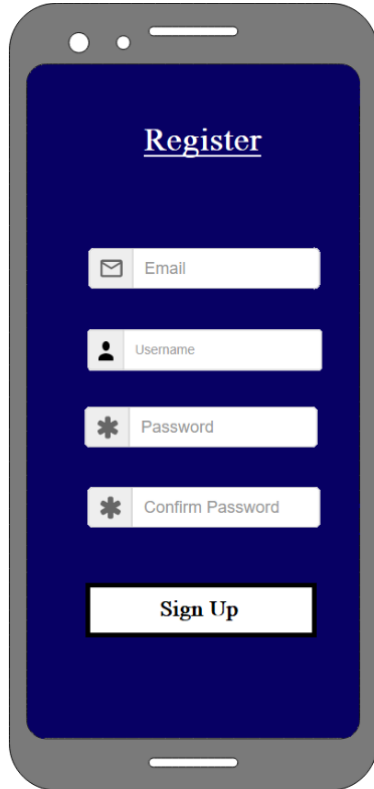

First Screen

This is the first screen of our app. It will prompt you to either login or register in order to access other functionalities.

You may sign in with Google or Facebook or with an email address.

Registration Screen

Register

Email

Username

Password

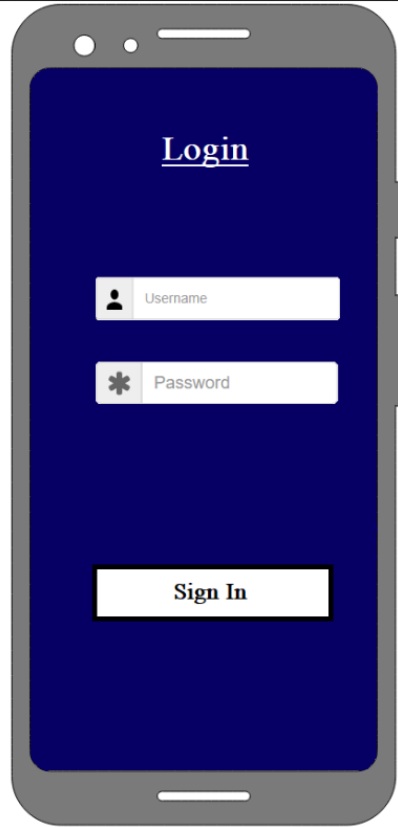

Confirm Password

Sign Up

This is our registration screen. It prompts you to enter an email, an username and a password.

This information is later stored in our Firebase database.

Login Screen

This is our login screen. It prompts you to enter your username and your password to sign in.

Main Screen

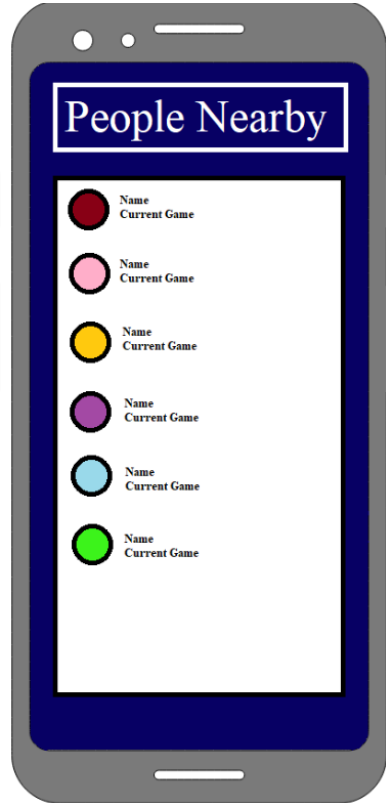

This is the main screen of our app. It displays your map and friends near you who also have their location enabled.

It also shows an overview of your profile (the current game you're playing).

It shows your most recent messages and has buttons to allow you to see all of your messages as well as a toggle switch to enable/disable location sharing.

People Nearby Screen

This screen displays a list of people near you who have their public location sharing enabled.

People who are not on your friends list will appear here, so as to not give away your location to strangers

Profile Screen

This is our profile page.

It displays your chosen profile picture, your username, the game you're currently playing and your status.

It has a button to edit your profile and a button to view your friends list.

Profile Screen 2 (other users)

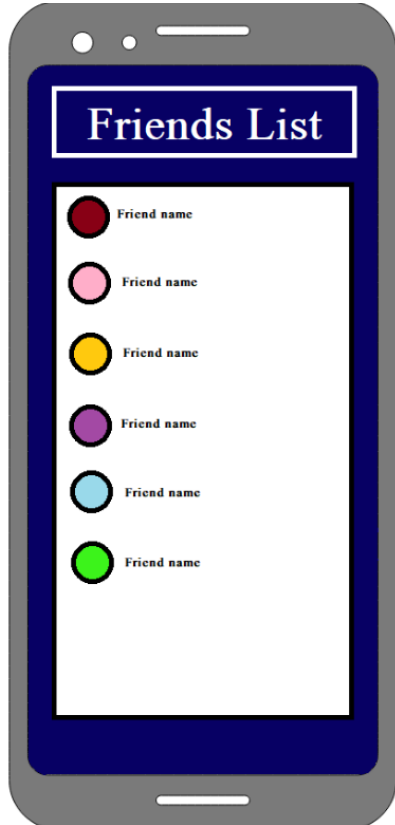

This is how a user would view other users' profiles.

It displays their profile picture, their username, the game they're currently playing and their status.

It includes a button to add to friend your friend list.

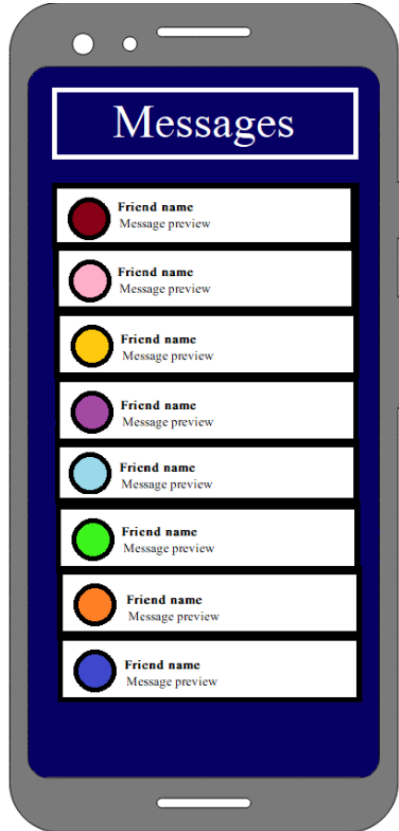

Friends List Screen

This is the friends list screen.

It displays a list of all your friends (it shows their profile pictures and their names and if you click on it, it takes you to their profile).

Messages Screen

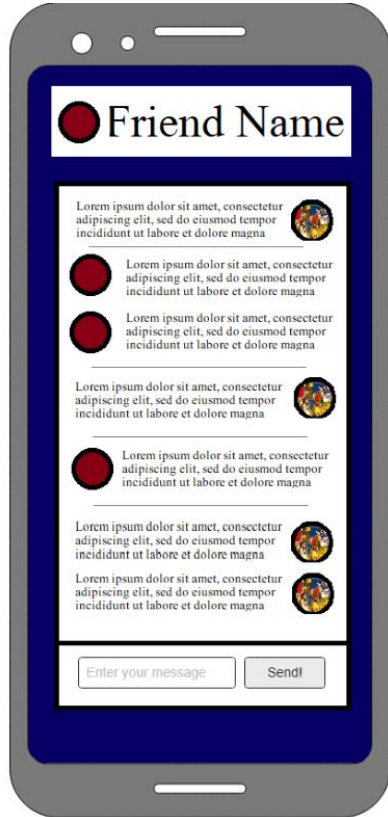

This page displays a list of all your recent conversations.

It displays your friend's profile picture, their name and the last message in the conversation.

When clicked, it redirects you to the chat.

Chat Screen

This page displays the conversation between you and someone else.

It allows you to send a message and view previous messages.

Other information

- Number of screen flows: 10 screens
- Chosen Database: Firebase
